Our educational provision is designed around a person-centred approach. We focus on the individual needs of each child attending our school, with high levels of ambition for personal goal-setting and achievement.

Alongside a comprehensive Welsh curriculum, we focus on core life skills, such as communication and social ability, sensory processing and emotional regulation. Each student is supported to develop personal independence for life after school.

The facilities centre on a charming historical building, and incorporate substantial outdoor areas for further development. We enjoy several adaptable spaces, in which we can deliver enriched curriculum opportunities for individualised learning.

Facilities will also include an immersion room and spaces for expert clinical and therapeutic resources. Our outdoor areas will feature a sensory garden and play space, including a large, multi-purpose sports hall and horticultural workshop.
