

# Chestnut Hill School

**Chestnut Hill is an independent school for autistic children & young people who may have additional needs.**

Our educational provision is designed around a person-centred approach. We focus on the individual needs of each child attending our school, with high levels of ambition for personal goal-setting and achievement.

Alongside a comprehensive curriculum, we focus on core life skills, such as communication and social inclusion, sensory processing and emotional regulation. Each student is supported to develop personal independence for life in school and beyond.

The facilities are housed in a charming historical building, and incorporate substantial outdoor areas for further development. We enjoy several adaptable spaces, in which we can deliver our enriched curriculum opportunities for individualised learning.

Facilities include an immersive suite and spaces for expert clinical and therapeutic resources, sensory room, art room, library, multi-purpose sports hall and separate sensory circuits area. Plus a large, newly developed horticulture area, garden, fire pit, forest school and sensory path.
